Address: 3509 13th Street
Northport, AL 35476

SILICOSIS

ENTERED

Family: Married Number of Legal Children: 2

Smoking History: How many years: 1 or 2 cigars a day for 10 years. The client was advised to stop smoking for their health and the health of those with whom they live.

Work History:

The client claims exposure to silica while working as a Coater Operator (Asphalt-on Fiberglass Roofing) at:

FROM/TO	NAME OF EMPLOYER	CITY, STATE/ SUB-CONTRACTOR
1971-1999	Elk Roofing	Tuscaloosa, AL

Complaints:

Shortness of Breath: Yes

Has or Had Cancer: No TB: Yes, 1974 the client indicated that it was bone TB and took medicine for 1 year.

Has or Had Connective Tissue Disease: No

Surgery in the last 6 months: No

Exam:

Height: 70 Weight: 250

Enlarged Heart: No Possible Cancer: Yes Comments: RLZ. The client was advised to see their doctor.

Ankle Edema: No Fingernails: Clubbing: Yes Cyanosis: No

Breath Sounds: Normal

X-Ray:

X-Ray Report: See attached Pulmonary Function Test: See attached

Summary:

On the basis of this client's history of occupational exposure to silica and a B reading of the clients chest x-ray, then with a reasonable degree of medical certainty, Joseph A. Anders has silicosis.

Exposure to silica is associated with an increased incidence of lung cancer, connective tissue diseases and autoimmune disease. Therefore, this client should consult with his or her physician.

I certify that I saw and examined Joseph A. Anders in Columbus, MS on April 23, 2002.
